Yeshwantrao Chavan College of Engineering, Nagpur	AAA

PROF. RAVESH JALNEKAR
Director, Vishwakarma Institute of Technology, Pune

Engineering curriculum in our country is highly competitive and rigorously trains students to withstand this competition. It is mostly information-centric and leaves little scope for self-learning, creativity, and inventions. It requires a consistent makeover to make it more interesting to inculcate research aptitude, enhance employability, and to nurture entrepreneurial skills among the students. The curriculum should translate a student into a professional with ethical and moral values. It should enable a student to withstand stress and tensions, maintaining a balance between ecology and ecosystem.
